

LASER SCALERS

Our laser scalers are designed to assist underwater measuring. Give your reports context by being able to estimate the size of structural defects, obstructions, fish etc.

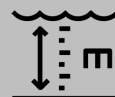

PRODUCT FEATURES

5VDC (200mA) input

Can be triggered with our HELM app, the BR2 ROV hand controller, or using the included MOSFET board

Depth rated to 300m

Highly visible 3mW green lasers

Available with mount to suit the Blue Robotics BR2. Custom mounts available on request

Manufactured from 6061-T6 aluminium with type 3 (hard) anodising

Terminated with a Blue Robotics WetLink penetrator, or Blue Trail Engineering Cobalt connector

Designed and made in Australia, supported worldwide
